SYLLABUS AND REGULATIONS

Basic B.Sc.Nursing

(4 Years Program)

2020 – 2021 Revised

Sister Nivedita University

DG Block (Newtown), Action Area I,
Newtown, New Town, West Bengal 700156
I. PHILOSOPHY

(Adapted from Indian Nursing Council) We believe that,

Health is a state of well-being that enables a person to lead a psychologically, socially and economically productive life. Health is a right of all the people. Individuals, families and communities have a responsibility towards maintaining their health.

Nursing contributes to the health services in a vital and significant way in the health care delivery system. It recognizes national health goals and is committed to participate in the implementation of National Health Policies and programmes. It aims at identifying health needs of the people, planning and providing quality care in collaboration with other health professional and community groups.

Scope of nursing practice encompasses provision of promotive, preventive, curative and rehabilitative aspects of care to people across their life span in wide variety of health care settings. Practice of nursing is based upon application of basic concepts and principles derived from the physical, biological and behavioural sciences, medicine and nursing.

Nursing is based on values of caring, and aims to help individuals to attain independence in self-care. It necessitates development of compassion and understanding of human behaviour among its practitioners to provide care with respect and dignity and protect the rights of individuals & groups.

Undergraduate nursing program is broad based education within an academic framework specifically directed to the development of critical thinking skills, competencies & standards required for practice of professional nursing and midwifery as envisaged in National Health Policy 2002.

The teachers have the responsibility to be role models and create learning environment that enables students to acquire inquiry driven, self-directed learning and foster an attitude of lifelong learning.

Under graduate nursing education program prepares its graduates to become exemplary citizen by adhering to code of ethics and professional conduct at all times in fulfilling personal, social and professional obligations so as to respond to national aspirations.
II. AIMS:

The aim of the undergraduate nursing program is to:

- Prepare graduates to assume responsibilities as professionals, competent nurses and midwives in providing promotive, preventive, curative, and rehabilitative services,
- Prepare nurses who can make independent decisions in nursing situations, protect the rights of and facilitate individuals and groups in pursuit of health, functions in the hospital, community nursing services, and conduct research studies in the areas of nursing practice.

They are also expected to assume the role of teacher, supervisor, and manager in a clinical / public health setting.

III. OBJECTIVES:

On completion of four-year B.Sc. Nursing Program the graduate will be able to:

1. Apply knowledge from physical, biological and behavioral sciences, medicine including alternative systems and nursing in providing nursing care to individuals, families and communities.
2. Demonstrate understanding of life styles and other factors, which affect health of individuals and groups.
3. Provide nursing care based on steps of nursing process in collaboration with individuals and groups.
4. Demonstrate critical thinking skill in making decisions in all situations in order to provide quality care.
5. Utilize the latest trends and technology in providing healthcare.
6. Provide promotive, preventive and restorative health services in line with the National Health Policies and Programmes.
7. Practice within the frame work of code of ethics and professional conduct, and acceptable standards of practice within the legal boundaries.
8. Communicate effectively with individuals and groups, and members of the health team in order to promote effective interpersonal relationship and teamwork.
9. Demonstrate skills in teaching to individuals and groups in clinical and community health settings.
10. Participate effectively as members of the health team in health care delivery system.
11. Demonstrate leadership and managerial skills in clinical / community health settings.
12. Conduct need based research studies in various settings and utilize the research findings to improve the quality of care.

13. Demonstrate awareness, interest, and contribute towards advancement of self and of the profession.

1. ELIGIBILITY CRITERIA FOR ADMISSION:

   a. The minimum age for admission shall be 17 years on or before 31st Dec. of the year of admission

   b. The minimum educational requirements: A candidate should have passed in the subjects of PCB and English individually and must have obtained a minimum 45% marks taken together in PCB at the qualifying examination (Higher Secondary, 10+2) and equivalent with 12 years schooling from a recognized board or university with minimum of 45% aggregate marks (40% marks for SC, ST, OBC candidates).

   c. Candidate shall be medically fit.

2. SELECTION OF CANDIDATES

   Selection of the candidates should be based on the merit of the entrance examination held by university or competent authority or as per regulation of the University from time to time.

3. DURATION OF THE COURSE:

   B.Sc. Nursing Degree course shall be of four academic years including internship.
CURRICULUM

Course duration = 04 Years
Available Weeks /Academic year = 52 Weeks
Examination (including preparatory) = 4 Weeks
Vacation = 8 Weeks
Gazetted holidays = 3 Weeks
Available Weeks = 37 Weeks
Hours per week = 40 hours

Hours available per academic year (1st to 3rd yr.) = 1480 (37 weeks x 40 hours) x 3 = 4440 hrs.
Hours available 4th yr. = 560 (14 weeks x 40 hours per week)
Hours available for internship (4th yr.) = 1152 (24 weeks x 48 hours per week)
Total hrs. for 4th yr. = 1712 hrs. (560 hrs + 1152 hrs)
Hours available for 4 yrs. = 6152 hrs. (4440 hrs + 1712 hrs)

MEDIUM OF INSTRUCTION:

English shall be the medium of instruction for all the subjects of study and for examination of the course.

4. REGISTRATION:

A Candidate admitted in the B. Sc, Nursing Degree course under the Sister Nivedita University submit the prescribed application form for registration duly filled along with prescribed fee and declaration in the format, to the Academic Officer on or before the cut-off date prescribed by the University.

5. ATTENDANCE REQUIRED FOR APPEARING EXAMINATION:

Examination will be conducted in both theory and practical as prescribed. The candidates will be permitted to appear for the University Examinations, only if they secure 80% of attendance in theory and practical for a subject irrespective of any kind of absence overall in a year.

The student should complete 100% of attendance in practical before course completion and the award of the Degree.

A student who does not meet the minimum attendance requirement in a year must repeat the course along with the next batch of students.
9. INTERNAL ASSESSMENT:

Internal assessment will be done in each subject of study and the marks will be awarded to the candidates as detailed in the scheme of examinations.

Minimum Internal Pass Marks for theory and practical to be 50% individually. The minimum pass mark for theory is 13 out of 25.

The candidate appearing for arrear examination in the subject will have the same internal marks secured in the previous examination (1st attempt).

A checklist or criteria to be developed by the respective institutions for objective evaluation of assignments, records, reports, and clinical presentations.

**Weightage for Internal Marks**

The internal marks to be calculated based on the following criteria

**Internal assessment for theory: (25 Marks)**

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Weightage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Best of three Unit test marks</td>
<td>45%</td>
</tr>
<tr>
<td>Best of two Assignment marks</td>
<td>25%</td>
</tr>
<tr>
<td>Model Exam</td>
<td>25%</td>
</tr>
<tr>
<td>Attendance</td>
<td>5%</td>
</tr>
<tr>
<td>Total</td>
<td>100%</td>
</tr>
</tbody>
</table>

**Internal assessment for Practical: (100 Marks / 50 Marks)**

<table>
<thead>
<tr>
<th>Criteria</th>
<th>Weightage (100%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Continuous Evaluation of Clinical Performance</td>
<td>30%</td>
</tr>
<tr>
<td>Clinical assignment</td>
<td>20%</td>
</tr>
<tr>
<td>(Case study/ Practical record/Case book)</td>
<td></td>
</tr>
<tr>
<td>Clinical Presentation</td>
<td>10%</td>
</tr>
<tr>
<td>Observational /field visit/ Health talk</td>
<td>10%</td>
</tr>
<tr>
<td>Model Practical Examination</td>
<td>30%</td>
</tr>
<tr>
<td>Total</td>
<td>100%</td>
</tr>
</tbody>
</table>

On Completion of Internship, Internal Assessment out of 100 marks should be sent to the University for Inclusion in the mark sheet.

The Institution shall not submit average internal marks of the students more than 75%.
10. EXAMINATIONS:

University examinations to be conducted after the completion of Eleven months of the course for the annual pattern.

The particulars of subjects for examinations and distribution of marks are detailed in the Scheme of Examination.

The annual examination for the main subjects will be conducted by the University and the marks for the internal subjects will be awarded by the subject faculty and forwarded to University by the principal of concerned Institution.

Practical Examinations shall be jointly conducted by one internal and one external examiner duly appointed by the University.

To be an examiner the faculty should possess three years of experience after MSC Nursing as per University regulation. To be an examiner for nursing foundations course faculty having M.Sc. (Nursing) with any specialty shall be considered provided she is currently teaching the subject.

If a candidate fails in either theory or practical paper she has to re-appear for both the papers (Theory and practical).

A candidate should clear all arrear subjects before appearing for final exam in IV year.

All practical examinations must be held in the respective clinical areas.

Maximum number of candidates for Practical examination should not exceed more than 20 students per day.

Final year marks shall be withheld till the candidate completes required attendance for practical and internship.

Question paper of Anatomy and Physiology will consist of Section A—Anatomy of 37 marks and Section B—Physiology of 38 marks.

Question paper of Nutrition and Biochemistry will consist of Section A—Nutrition of 45 marks and Section B—Biochemistry of 30 marks.

Question paper of Pharmacology, Genetics, Pathology will consist of Section A—Pharmacology of 38 marks and Section B—Pathology of 25 marks and Genetics of 12 marks.

Question paper of Nursing Research and Statistics should be of 50 marks and 25 marks.

Minimum pass marks for English shall be 40%.
11. MARKS QUALIFYING FOR PASS:

A candidate has to pass in theory and practical exam separately in both internal and external examination of each paper.

A candidate has to secure minimum of 50% of marks in the University Theory and practical Examinations separately except for English.

Minimum pass mark for English shall be 40% only.

A candidate has to secure minimum of 50% of marks in Introduction to Computer.

A candidate has to secure minimum of 50% of marks in each Section A & B separately where two subjects are combined in single paper. If a candidate who has failed to secure the minimum pass mark of 50% either in Section A or B, the candidate has to write again both the sections irrespective the fact whether the candidate has passed in one section.

12. ELIGIBILITY / MAXIMUM DURATION FOR THE AWARD OF THE DEGREE

The candidates shall be eligible for the Degree of Bachelor of Nursing when they have undergone the prescribed course of study for a period of not less than four years in an institution approved by the University and have passed the prescribed examinations in all subjects.

The maximum period to complete the course successfully should not exceed a period of eight years.

13. DECLARATION OF CLASS:

A successful candidate obtaining 80% and more marks in the grand total aggregate at first attempt shall be declared to have passed with First class with Distinction.

A successful candidate obtaining 70% and more but less than 80% of marks in the grand total aggregate at first attempt shall be declared to have passed with First Class.

A successful candidate obtaining 60% and more but less than 70% of marks in the grand total aggregate at first attempt shall be declared to have passed with Second Class.

A successful candidate obtaining 50% and more but less than 60% in the grand total aggregate at first attempt shall be declared to have passed.

*project work to be carried out during internship

### Note:

- Internship means 8 hours of integrated clinical duties in which 2 weeks of evening and night shift duties are included.

- Internship should be carried out as 8 hours per day @ 48 hours per week.

- Students during internship will be supervised by nursing teachers.

- Students will be eligible to appear in the fourth-year final examination only after completion of Internship (24 weeks).

- On Completion of Internship Internal Assessment out of 100 marks should be sent to the University for inclusion in the marklist.

VI. COURSE DESCRIPTION:

**English**

**Placement** – First Year  

**Time:** Theory – 60 hours

**Course Description:** The Course is designed to enable students to enhance ability to comprehend spoken and written English (and use English) required for effective communication in their professional work. Students will practice their skills in verbal and written English during clinical and classroom experiences.

| IV   | 6          | • Describe the structure & function of nervous system | The Nervous System  
• Structure of Neurologia&neurons  
• Somatic Nervoussystem  
  ▶ Structure of brain, spinal cord, cranial nerves,spinal nerves, peripheral nerves  
• Autonomic Nervous System- sympathetic,parasympathetic  
  ▶ Structure,location  
  ▶ Alterations indisease  
• Applications and implications innursing | • Lecture Discussion  
• Explain using models, charts, slides,specimens  
• Recordbook | • Short answer questions  
• Objective type |
| V    | 6          | • Explain the Structure & functions of sensory organs | The Sensory System  
• Structure of skin, eye, ear, nose, tongue, (Auditory and olfactoryapparatus)  
• Alterations indisease  
• Applications and implications innursing | • Lecture Discussion  
• Explain using models, charts, slides,specimens  
• Recordbook | • Short answer questions  
• Objective type |
| VI   | 7          | • Describe the structure & function of circulatory and lymphatic system | Circulatory and lymphatic system  
• The CirculatorySystem  
  ▶ Blood – Microscopic structure  
  ▶ Structure ofHeart  
  ▶ Structure of blood vessels- Arterial & VenousSystem,  
  ▶ Circulation: systemic, Pulmonary,coronary  
• Lymphatic system Lymphatic vessels andlymph  
  ▶ Lymphatici tissues  
  Thymus gland  
  Lymph nodes  
  Spleen  
  LymphaticnODULES  
• Alterations indisease  
• Applications and implications innursing | • Lecture Discussion  
• Explain using models, charts, slides,specimens  
• Recordbook | • Short answer questions  
• Objective type |
| VII  | 5          | • Describe the structure & function of Respiratory system | The Respiratory System  
• Structure of the organs of respiration  
• Muscles of respiration: Intercostals and Diaphragm  
• Alterations indisease  
• Applications and implications innursing | • Lecture Discussion  
• Explain using models, torso, charts, slides, specimens  
• Recordbook | • Short answer questions  
• Objective type |
| VIII | 6 | • Describe the structure & function of Digestive system | The Digestive System  
• Structure of Alimentary tract and accessory organs of digestion  
• Alterations indisease  
• Applications and implications in nursing | • Lecture Discussion  
• Explain using models, torso, charts, slides, specimens  
• Recordbook | • Short answer questions  
• Objective type |
| --- | --- | --- | --- | --- | --- |
| IX | 4 | • Describe the structure & function of excretory system | The Excretory System(Urinary)  
• Structure of organs ofurinary System: Kidney, ureters, urinary bladder, urethra, structure ofskin  
• Alterations indisease  
• Applications and implications innursing | • Lecture Discussion  
• Explain using models, torso, charts, slides, specimens  
• Recordbook | • Short answer questions  
• Objective type |
| X | 4 | • Describe the structure & function of endocrine system | The Endocrine System  
• Structure of Pituitary, Pancreas, thyroid, Parathyroid, thymus and adrenalglands  
• Alterations indisease  
• Applications and implications innursing | • Lecture Discussion  
• Explain using models, Torso, charts, slides, specimens  
• Recordbook | • Short answer questions  
• Objective type |
| XI | 4 | • Describe the structure & function of Reproductive system | The Reproductive System including breast  
• Structure of female reproductive organs  
• Structure of male reproductive organs  
• Structure of breast  
• Alterations indisease  
• Applications and implications in nursing | • Lecture Discussion  
• Explain using models, Torso, charts, slides, specimens  
• Recordbook | • Short answer questions  
• Objective type |
# Physiology

**Placement** – First Year  
**Time:** Theory – 60 hours

**Course Description:** The Course is designed to assist the students to acquire knowledge of the normal physiology of various human body systems and understand the alterations in physiology in disease and practice of nursing.

| I    | 4          | - Describe the physiology of cell, tissues, membranes and glands | **Cell Physiology**  
- Tissue – formation, repair  
- Membranes & glands – functions  
- Alterations in disease  
- Applications and implications in nursing | • Lecture Discussion | • Short answer questions  
• Objective type |
| II   | 4          | - Describe the bone formation and growth and movements of skeleton system | **Skeletal System**  
- Bone formation and growth  
- Bones – Functions and movements of bones of axial and appendicular skeleton, bone healing  
- Joints and joint movement  
- Alterations in disease  
- Applications and implications in nursing | • Lecture Discussion  
• Explain using charts, models and films  
• Demonstration of joint movements | • Short answer questions  
• Objective type |
| III  | 4          | - Describe the muscle movements and tone and demonstrate muscle contraction and tone | **Muscular System**  
- Muscle movements, Muscle tone, Physiology of muscle contraction, levels and maintenance of posture  
- Alterations in disease  
- Applications and implications in nursing | • Lecture Discussion  
• Explain using charts, models and films  
• Demonstration of muscle movements, tone and contraction | • Short answer questions  
• Objective type |
| IV   | 7          | - Describe the physiology of nerve stimulus, reflexes, brain cranial and spinal nerves  
- Demonstrator reflex action and stimulus | **Nervous System**  
- Functions of Neuralgia & Neurons  
- Stimulus & Nerve - Impulse - Definitions & Mechanism  
- Functions of brain, spinal cord, cranial and spinal nerves  
- Cerebrospinal fluid – Composition, circulation and function  
- Reflex arc, reflex action and reflexes  
- Autonomic functions –  
  - Pain: Somatic, visceral and referred | • Lecture Discussion  
• Explain using charts, models and films  
• Demonstration of nerve stimulus reflex action, reflexes | • Short answer questions  
• Objective type |

| V    | 8          | • Describe the physiology of blood and functions of Heart  
• Demonstrate blood cell count, coagulation, grouping, Hb: BP and Pulse monitoring | Circulatory System  
• Blood formation, composition, blood groups, blood coagulation  
• Hemoglobin: Structure, Synthesis and breakdown, Variation of molecules, estimation  
• Functions of Heart, Conduction, Cardiac cycle, circulation – Principles, Control, factors influencing BP and Pulse  
• Alterations indisease  
• Applications and implications in nursing | • Lecture  
• Discussion  
• Explain using charts, films  
• Demonstration of blood cell count, coagulation, grouping, Hemoglobin estimation, Heart conduction system.  
• Measurement of pulse, BP | • Short answer questions  
• Objective type |
| VI   | 6          | • Describe the physiology and mechanisms of respiration  
• Demonstrates spirometry | The Respiratory System  
• Functions of respiratory organs  
• Physiology of respiration  
• Pulmonary ventilation, Volume  
• Mechanics of respiration  
• Gaseous exchange in lungs  
• Carriage of oxygen & carbon-dioxide  
• Exchange of gases in tissues  
• Regulation of respiration  
• Alterations indisease  
• Applications and implications in nursing | • Lecture  
• Discussion  
• Explain using charts, films  
• Demonstration of spirometry | • Short answer questions  
• Objective type |
| VII  | 6          | • Describe the physiology of digestive system  
• Demonstrates BMR | The Digestive System  
• Functions of organs of digestive tract. Movements of alimentary tract, Digestion in mouth, stomach, small intestines, Large intestines, Absorption of food. Functions of liver, gall bladder and pancreas  
• Metabolism of carbohydrates, protein and fat | • Lecture  
• Discussion  
• Explain using charts, films | • Short answer questions  
• Objective type |
| VIII | 5          | • Describe the physiology of excretory System | The Excretory System  
• Functions of kidneys, ureters, urinary bladder & urethra  
• Composition of urine  
• Mechanism of urine formation | • Lecture  
• Discussion  
• Explain using charts, films | • Short answer questions  
• Objective type |

| I    | 1          | • Describe the structure composition and functions of cell  
• Differentiate between Prokaryote and eukaryote cell  
• Identify techniques of Microscopy | **Introduction:**  
• Definition and significance in nursing  
• Review of structure, Composition and Functions of cell  
• Prokaryote and Eukaryote cell organization  
• Microscopy | • Lecture discussion using charts, slides.  
• Demonstrate use of microscope | • Short answer questions  
• Objective type |
| II   | 6          | • Describe the structure and functions of cell membrane | **Structure and functions of Cell membrane:**  
• Fluid mosaic model tight junction, Cytoskeleton.  
• Transport, mechanism: diffusion, osmosis, filtration, active. Channel, sodium pump.  
• Acid base balance maintenance & diagnostic tests.  
  □ PH buffers | • Lecture discussion | • Short answer questions  
• Objective type |
| III  | 6          | • Explain the metabolism of carbohydrate | **Composition and metabolism of Carbohydrates:**  
• Types, Structure, composition and uses.  
  □ Monosaccharide, Disaccharides, Polysaccharides, Oligosaccharides.  
• Metabolism  
  □ Pathways of glucose  
    - Glycolysis  
    - Gluconeogenesis: Cori’s cycle, Tri carboxylic acid (TCA) cycle  
    - Glycogenolysis  
    - Pentose Phosphate pathways (Hexose monophosphate)  
  □ Regulation of blood | • Lecture discussion  
• Demonstrate of blood glucose monitoring | • Short answer questions  
• Objective type |

# Nursing Foundations

**Placement:** First Year  
**Time:**  
- Theory - 265 hours  
- Practical - 650 hours (200 lab and 450 clinical)

**Course Description:** This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various Supervised Clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in Supervised Clinical settings.

| I    | 10         | Describe the concept of health, illness and health care agencies | **Introduction**  
- Concept of Health: Health – Illness continuum  
- Factors influencing health  
- Causes and risk factors for developing illness  
- Body defences: Immunity and immunization  
- Illness and illness Behaviour:  
- Impact of illness on patient and family  
- Health care services: Health Promotion and Prevention, Primary Care, Diagnosis, Treatment, rehabilitation and Continuing Care  
- Health care teams  
- Types of health care agencies:  
- Hospitals: Types, Organisation and Functions  
- Health Promotion and Levels of Disease Prevention  
- Primary health care and its delivery: Role of nurse | • Lecturediscussion  
• Visit to health care agencies | • Essaytype  
• Short answers  
• Objective type |
| II   | 16         | Explain concept and scope of nursing  
Describe values, code of ethics and professional conduct for nurses in India | **Nursing as a profession**  
- Definition and Characteristics of a profession  
Nursing:  
- Definition, Concepts, philosophy, objectives  
- Characteristics, nature and scope of nursing practice  
- Functions of nurse  
- Qualities of a nurse | • Lecture discussion  
• Casediscussion  
• Roleplays | • Essaytype  
• Short answers  
• Objective type |

  - Providing urinal / bed pan
  - Condomdrainage
  - Perinealcare
  - Catheterization
  - Care of urinarydrainage
  - Care of urinary diversions
  - Bladderirrigation

Bowel Elimination
- Review of Physiology of Bowel Elimination, Composition and characteristics of faeces
- Factors affecting Bowel elimination
- Alteration in Bowel Elimination
- Types and Collection of specimen of faeces: Observation
- Facilitating bowel elimination: assessment, equipments, procedures and special considerations
  - Passing of Flatus tube
  - Enemas
  - Suppository
  - Sitz bath
  - Bowelwash
  - Care of Ostomies

Mobility and Immobility
- Principles of Body Mechanics
- Maintenance of normal body Alignment and mobility
- Factors affecting body alignment and mobility
- Hazards associated with immobility
- Alteration in body
Alignment and mobility
- Nursing interventions for impaired Body Alignment and Mobility: assessment, types, devices used, method and special considerations, rehabilitation aspects
  o Range of motion exercises
  o Maintaining body alignment: Positions
  o Moving
  o Lifting
  o Transferring
  o Walking
  o Restraints
- Oxygenation
  - Review of Cardiovascular and respiratory Physiology
  - Factors Affecting Oxygenation
  - Alterations in oxygenation
  - Nursing interventions in oxygenation: assessment, types, equipment used, procedure and special considerations.
  o Maintenance of patent airway
  o Oxygen administration
  o Suction
  o Inhalations: dry and moist
  o Chest Physiotherapy and postural drainage
  o Care of Chest drainage
  o Pulse oximetry
  o CPR-Basic lifesupport
- Fluid, electrolyte, and Acid-Base Balances
  - Review of Physiological Regulation of Fluid, Electrolyte, and Acid-Base Balances
  - Factors Affecting Fluid, Electrolyte and Acid-Base Balances
  - Alterations in Fluid, Electrolyte, and Acid- Base Balances
  - Nursing interventions in

### Learning Objectives
- Protection from Needle stick Injuries: Giving Medications with a safety syringes
- Routes of parenteral therapies:
  - Intradermal: purpose, site, equipment, procedure, special considerations
  - Subcutaneous: purpose, site, equipment, procedure, special considerations
  - Intravenous: purpose, site, equipment, procedure, special considerations
  - Advanced techniques: epidural, intrathecal, intraperitoneal, intraosseous, intraperitoneal, intraplural, intraarterial - Role of nurse

### Teaching Methods
- Topical administration: nurse
- Application to skin, membrane
- Intradermal: purpose, site, equipment, procedure, special considerations
- Application to mucous membrane
- Insertion of Drug into body cavity: rectum/rectum, vagina/rectum
- Gargle and swabbing the throat
- Direct application of liquids: gargle and swabbing the throat
- Insertion of Drug into body cavity: rectum
- Medication packing into rectum/vagina
- Instillations: ear, eye, nasal, bladder, and rectal
- Irrigations: eye, ear, bladder, and vaginal

### Assessment Methods
- Learning

**Nursing Foundations - Practical**

**Placement:** First Year  
**Time:** Practical - 650 hours  
(200 lab and 450 clinical)
Course Description: This course is designed to help the students to develop an understanding of the philosophy, objectives, theories and process of nursing in various clinical settings. It is aimed at helping the students to acquire knowledge, understanding and skills in techniques of nursing and practice them in clinical settings.

Describe Drugs used on Nervous system and nurse’s responsibilities

### Drugs acting on Nervous system
- Basic & applied pharmacology of commonly used:
  - Analgesics and Anaesthetics
    - Analgesics
    - Non steroidal anti-inflammatory (NSAID)

- Lecture
- Discussion
- Drugstudy / presentation
- Short answers
- Objective type

### Cardiovascular drugs
- Haematinics
- Cardiotonics,
- Antianginals
- Anti-hypertensives & vasodilators
- Anti-arrhythmics
- Plasmaexpanders
- Coagulants & anticoagulants
- Antiplatelets & thrombolytics
- Hypolipidemics

| I    | Th 3 Pr.   | • Define the common terms used in pathology.  
• Appreciate the deviations from normal to abnormal structure and functions of the bodysystem.  
• Introduction:--  
  □ Importance of the study of pathology  
  □ Definition of terms  
  □ Methods and techniques  
  □ Cellular and Tissue changes.  
  □ Infiltration and generation  
  □ Inflammations and Infections  
  □ Woundhealing  
  □ Vascularchanges  
  • Cellular growth, Neoplasms:  
    □ Normal & Cancercell  
    □ Benign and Malignantgrowths  
    □ In situ carcinoma  
    □ Disturbances of fluid andelectrolyte imbalance | • Lecture Discussion  
• Explain using charts  
• Objective type | • Short answers  
• Objective type |
| II   | Th 10 Pr. 5 | • Explain pathological changes in disease condition of variousystem | Special Pathology: -  
• Pathological changes in disease conditions of variousystems.  
• Respiratorytract  
  □ Tuberculosis, Bronchitis, Pleural effusion and pneumonia.  
  □ Lung abscess, emphysema, bronchiectasis.  
  □ Bronchial asthma, chronic obstructive pulmonary disease &tumours.  
• Cardio – vascular system:- | • Lecture Discussion  
• Explain using charts, slides, specimen, X-rays and scans  
• Visit to Pathology lab, endoscopy unit and OT | • Short answers  
• Objective type |

• Pericardial effusion
• Rheumatic heart disease
• Infective endocarditis, atherosclerosis
• Ischemia, infarction & aneurysm.

• Gastro Intestinal Tract:
  • Peptic ulcer, typhoid
  • Carcinoma of GI tract – buccal, Esophageal,
  • Gastric & intestinal

• Liver, Gall bladder – & pancreas:
  • Hepatitis, Chronic liver abscess, cirrhosis
  • Tumours of liver, gall bladder and pancreas.
  • Cholecystitis

• Kidneys & Urinary tract
  • Glomerulonephritis, Pyelonephritis
  • Calculi, renal failure, renal carcinoma & cystitis.

• Male genital systems:
  • Cryptorchidism, testicular atrophy
  • Prostatic hyperplasia, carcinoma penis & prostate

• Female genital systems
  • Fibroids
  • Carcinoma cervix and endometrium.
  • Vesicular mole, Choriocarcinoma
  • Ectopic gestation
  • Ovarian cyst & tumours

• Cancer Breast:
• Central nervous system:
  • Hydrocephalus, Meningitis, encephalitis
  • Vascular disorders – thrombosis, embolism
  • Stroke, Paraplegia, quadriplegia

| I    | 3          | - Explain nature principles and perspectives of heredity | **Introduction:**  
  - Practical application of genetics in Nursing.  
  - Impact of genetic condition on families.  
  - Review of cellular division mitosis and meiosis.  
  - Characteristics and structure of genes.  
  - Chromosomes – sex determination.  
  - Chromosomal aberrations  
    Patterns of inheritance.  
    □ Mendelian theory of inheritance  
    □ Multiple allots and blood groups.  
    □ Sex linked inheritance  
    □ Mechanism of inheritance.  
    □ Errors in transmission.  
    (Mutation) | - Lecture  
- Discussion  
- Explain using charts, slides | - Short answers  
- Objective type |
| II   | 3          | - Explain maternal, prenatal and genetic influences on development of defects and disease | **Maternal, Prenatal and genetic influences on development of defects and diseases:**  
  - Conditions affecting the mother genetic and infections.  
  - Consanguinity atopy  
  - Prenatal nutrition and food allergies.  
  - Maternal Age.  
  - Maternal drug therapy.  
  - Prenatal testing and diagnosis.  
  - Effect of Radiation, drugs and chemicals.  
  - Infertility  
  - Spontaneous abortion  
  - Neural tube defects and the role of folic acid in lowering the risks.  
  - Down syndrome (Trisomy21) | - Lecture  
- Discussion  
- Explain using charts, slides | - Short answers  
- Objective type |
| III  | 2          | - Explain the screening | **Genetic testing in the neonates and children:** | - Lecture

**Unit:**

- **Time (Hrs):** 15
- **Learning Objectives:**
  - Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and management of patients (adults including elderly) with disorder of integumentary system.
  - Nursing management of patient (adults including elderly) with muculoskeletal problems.
- **Content:**
  - Review of anatomy and physiology of skin and its appendage.
  - Nursing Assessment-History and Physical assessment.
  - Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of disorder of skin and its appendages.
  - Lesions and abrasions.
  - Infection and infestations, Dermatitis.
  - Dermatoses, Infectious and Non infectious "Inflammatory dermatoses."
  - Acne Vulgaris.
  - Allergies and Eczema.
  - Psoriasis.
  - Malignant melanoma.
  - Alopecia.
- **Teaching Learning Activities:**
  - Lecture discussion.
  - Explain using Charts, graphs, Models, flims, slides.
  - Demonstration.
  - Practice session.
  - Case discussions/ Seminar.
  - Health education.
  - Supervised clinical.
- **Assessment Methods:**
  - Essay type.
  - Short answer.
  - Objective type.
  - Assessment of skills with check list.
  - Assessment of patient management problem.
- Disorder of:
  - Muscles, Ligaments and Joints - inflammation, infection, trauma
  - Bones - inflammation, infection, dislocation, fracture, tumor and trauma
  - Osteomalacia and osteoporosis
  - Arthritis
  - Congenital deformities
  - Spinal column defects and deformities, Tumor, Prolapsed inter vertebral disc, Pott's spine
  - Paget's disease
- Amputation
- Prosthesis
- Transplant & replacement surgeries
- Rehabilitation.
Special therapies, alternative therapies
Nursing procedures
Drugs used in treatment of disorder of musculoskeletal system

| Community Health Nursing   | 2 wks Urban & 2 wks Rural | • Build and maintain rapport  
• Identify demographic characteristics, health determinants and community health resources  
• Diagnose health needs of individual and families  
• Provide primary care in health center  
• Counsel and educate individual, family and community | • Use techniques of interpersonal relationship  
• Identification of health determinants of community  
• History taking  
• Physical examination  
• Collect specimens-sputum, malaria smear  
• Perform simple lab tests at centre-blood for hemoglobin and urine for albumin and sugar  
• Administer vaccines and medications to Adults  
• Counsel and teach individual, family and community -Nutrition -Hygiene -Self health monitoring -Seeking health services -Healthy life style -Family welfare methods -Health promotion | • To work with 2 assigned families each in urban and rural  
• Family study-1  
• Observation report of community-1  
• Health talks 2 (1 in Urban & 1 in Rural) | • Assess clinical performance with rating scale  
• Assess each skills with checklist  
• Evaluation of family study, observation report and health talk  
• Completion of activity record |
**Communication & Education Technology**

**Placement:** Second Year  
**Time:** Theory - 60 Hours  
**Practical:** 30 Hours

**Course Description:** This course is designed to help the students acquire an understanding of the principles and methods of communication and teaching. It helps to develop skill in communicating effectively, maintaining effective interpersonal relations, teaching individuals and group in clinical community health and educational settings.

Nursing Research and Statistics

Course Description: The Course is designed to enable students to develop an understanding of basic concepts of research, research process and statistics. It is further, structured to conduct/participate in need based research studies in various settings and utilize the research findings to provide quality nursing care. The hours for practical will be utilized for conducting individual/group research project.

## Midwifery and Obstetrical Nursing

**Placement:** Fourthyear  
**Time:** Theory - 90 hours  
**Practical –** 180

### Course Description:

This course is designed for students to appreciate the concepts and principles of midwifery and obstetrical nursing. It helps them to acquire knowledge and skills in rendering nursing care to normal and high risk pregnant woman during antenatal, natal and post natal periods in hospitals and community settings. It also helps to develop skills in managing normal and high risk neonates and participate in family welfare programme.
